Letter of Recommendation for Dave Yam

Dear EAE Admissions Committee,

It is with great pleasure that I recommend Dave Yam for admission to your Cybersecurity & Digital Forensics course. As Dave's Computing teacher, I have had the privilege of watching him grow into one of the most **well-rounded, accomplished, and community-minded** students I have taught.

Dave's list of achievements is impressive by any standard: the NYP SIT HUMANITY X HACK 2025, TP X VJC Data Science Hackathon 2026, International Junior Olympiad in AI 2026, the SGS Applied Learning Programme Changemaker Award 2025, and the MOE EAGLES and Good Progress Awards. However, what impresses me even more than the accolades is the **character and consistency** behind them. Dave does not chase certificates for their own sake; he pursues opportunities that genuinely stretch his abilities and allow him to contribute to others.

The Changemaker Award is particularly significant, as it recognises Dave's **commitment to using technology for positive social impact**. In an era where cybersecurity is often discussed in terms of threats and vulnerabilities, Dave understands that the ultimate goal is **protection and empowerment** - safeguarding people, communities, and institutions. This ethical grounding sets him apart from many of his peers.

In the classroom, Dave is a **natural leader and mentor**. He is the student that others naturally turn to for help, and he never hesitates to share his knowledge. His explanations are clear, patient, and encouraging. At the same time, he is humble about his own abilities and constantly seeks to improve. His MOE EAGLES Award is a well-deserved recognition of his **leadership, service, and exemplary conduct** in the Robotics CCA.

Dave's technical skills are strong - he writes clean, efficient code and grasps cybersecurity concepts quickly - but it is his **integrity, drive, and people-first approach** that make him an exceptional candidate. I have no doubt that he will not only excel in your programme but also become a leader in the cybersecurity field.

I give Dave my highest and most unreserved recommendation.

Sincerely,

Mr Leslie Tan
Lead Teacher (Computing)
